

- UP TO 30 MP • HIGH-CAPACITY BRIDGE

Lend'L Cloud 50

Our highest-capacity bridge, with extra processing headroom for large sites. It streams and records up to 30 megapixels of ONVIF cameras — including resource-heavy models — and synchronises encrypted footage to the Lend'L cloud.

AT A GLANCE

Up to 30 MP total

Mix cameras freely — e.g. 7×4 MP, 15×2 MP or 30×1 MP on one appliance.

Double the analytics

Runs analytics on up to 10 cameras — twice the throughput of the mid-tier bridge.

Handles heavy cameras

Extra resources for cameras that can't serve full and preview video at once.

Fully cloud managed

All firmware and software is managed and updated by Lend'L, automatically.

No open ports

No inbound connections to the internet — no router or firewall changes.

Rugged & self-aware

All-aluminium enclosure, broad temperature range, on-device status display.

Lend'L Cloud 50

	Lend'L Cloud 50 BEST VALUE
Total capacity*	Up to 30 MP of cameras
Resource-heavy mode	Up to 20 MP
Cameras with analytics	Up to 10
