

• UP TO 8 CAMERAS • MICRO FORM FACTOR

Lend'L Cloud 8

A compact cloud-managed bridge for smaller sites within a larger estate. It connects to your existing cameras, records locally, and synchronises footage to the Lend'L cloud — an easy, low-footprint path to a hybrid deployment.

AT A GLANCE

Up to 8 cameras

Micro form factor for satellite sites and locations with no space for a rack.

1 TB local storage

Ultra-endurance microSD holds roughly 15–30 days of footage on-site.

Hybrid storage

Keep video local, in the cloud, or both — move at your own pace, no rebuild.

Fully cloud managed

Automatic updates delivered from the cloud — no on-site technical expertise needed.

Use existing cameras

Works with any ONVIF Profile S cameras — little to no new hardware to buy.

Multi-workload ready

One appliance handles video today, with intrusion inputs on board for later.

Lend'L Cloud 8

	Lend'L Cloud 8 BEST VALUE
Max cameras*	Up to 8
Processor / memory	Quad-core 64-bit · 4 GB RAM
Local storage	1 TB microSD · 16 GB flash
